4- Reading comprehension

**A. Reading the following passage and choose the option (A, B, c or D) that best answers each of the questions below.**

My dream is to live in a big house surrounded by a big garden full of flowers and trees. I don't like to live in an apartment with blocks of flats and rude neighbors making noise in the middle of the night. My future house will be located outside the city. It might be near a river. I have always dreamt of living near rivers and hearing the sound of the birds in the morning.

My house will have a smart appliance which will monitor the current weather forecast to keep the temperature inside the house comfortable. It will use solar energy to heat the water; feed lights, computer, and other electronics. My future house will be an eco-house that uses clean energy to save the environment.

It will have a large garden for me to have as many pets as I wish for. Then there will be some robots in the house to help me with my housework. They will clean the house every morning, prepare all the meals for me and feed the dogs and cats.

1. Where will the house be located.

- A. inside the river      B. outside the city      c. in the sky      D. in the village

2. Why doesn't the author like to live in an apartment?

**B. Read the passage and decide whether the sentences are True (T) or False (F).**

Peter White has an idea of a new type of house for the future. The house will have new technology which will help it save a lot of energy. Firstly, a control panel will be the brain of the house. You can set the temperature, and the windows will close automatically when it's hot outside. Secondly, hot shower is usually a great start to the day, but this will be no normal shower. It will use rain water collected from the roof and heated by solar energy, or heat from the sun. Thirdly, the house will be a self-cleaning house. When you go are not at home, a system will recognize which place needs to be cleaned and do the cleaning. This house will be built and sold for those who are caring about the environment.

### My lovely house

The house we are living in is situated in the suburb of Ha Noi, within thirty minutes' drive off the central city. My house consists of four bedrooms, a living room, a bathroom with a shower, a dining room, a kitchen and a toilet. It is air-conditioned and well-furnished. The living room is decorated beautifully by famous artists. At night, the colorful neon lights increase the beauty of the

room. There, on Sundays and holidays my father usually spends his time playing chess or drinking tea with his friends. My mother and my two sisters are diligent and hard-working women. They often keep the house clean and tidy. I love my house very much because it is the place where I was born and grew up in the education of my father and in the tender loving care of my mother. I spent my whole childhood in the love and affection of my dear ones with so many sweet memories.

**The home of the future** /A

When you're out of the house, is the fridge on the phone to the supermarket? Is the heating system having a word with the bath? And when you get back home, does the doorknob recognise you and say hello? Probably not, but in the house of the future all this - and more - is possible.

Researchers say that technology will transform your home in ways you can only dream about.

Nanotechnology will play an important role. It will clean your windows. Intelligent spoons will check how hot or cold your soup is and the walls will sense if anyone is in your garden.

The next generation of fridges will use the Internet to make sure your food stays fresh and they'll get in touch with the supermarket to order some more and you'll never run out of milk again.

When you are on the way home and feel like a warm bath, all you have to do is sending a text message to the heating system. The heating system warms the water and even runs the bath so that as soon as you walk through the front door, you can jump in and relax.

Welcome to the smart home of the future!

Decide if the statements are true (T) or false (F).

1. Houses in the future will be smarter than today's houses. \_\_\_\_\_
2. Nanotechnology will help protect your house. \_\_\_\_\_
3. The fridge will remind you when to go to the supermarket. \_\_\_\_\_
4. You can control your heating system by using text messages. \_\_\_\_\_
5. Researchers say a smart house is just a dream \_\_\_\_\_

Read this passage carefully, then choose the correct answers.

Technology will allow homes in the future to be "smart." Appliances will communicate with each other - and with you. Your stove, for example, will tell you when your food is cooked and ready to eat. Refrigerators will suggest recipes based on food items you already have.

Futurologists predict that many homes will have robots in the future. Robots already do many things such as building cars and vacuuming floors. But scientists today are starting to build friendlier, more intelligent robots that will be able to show feelings with their faces, just like humans. These robots will do work around the house such as cooking and cleaning. They will even take care of children and the elderly.

How soon will this smart home be a reality? There's a good chance it will be a part of your life in 25 or 30 years, perhaps sooner.

1. What will make future houses smart?  
A. Technology            B. Computers            c. Humans            D. Scientists
2. According to the passage, the fridge of the future will be able to \_\_\_\_\_

### A lovely house

Peter lives in a house near the sea. It's an old house, about 100 years old, and it's very small. There are two bedrooms upstairs but no bathroom. The bathroom is downstairs next to the kitchen and there's a living room where there is a lovely fireplace. There's a garden in front of the house. The garden goes down to the beach and in spring and summer there are flowers everywhere. Peter lives alone with his dog, Boxer, but they have a lot of visitors. Their city friends often stay with them. Peter loves his house for many reasons: the garden, the flowers in summer, the fire in winter, but the best thing is the view from his bedroom window. Peter is thinking of a new house in the future with the help of Robots.
